their beautiful outdoor rugs from their **Mad Mats Collection**. Once I got this rug out of the box...I must say, I was immediately impressed. We unrolled the mat and laid it across our living room floor so we could inspect it. The mat is shipped rolled up so I thought it would take a few days for it to flatten out...I was wrong! It immediately laid flat for us. I was super impressed with the edges of the rug because it is tripled sewn along all edges so that you never have to worry about it unraveling. When you rub your hand over it you can tell it is made out of plastic but let me tell you...it is woven together perfectly and from a distance...you would never guess that it was woven plastic! The colors are deep and rich and I love the colors for this particular design. You can use this area rug indoors or outdoors...for now it will be in our family room until spring comes and then we will move it out to our patio deck for when we entertain. I love how easily we can clean it...just hose it down and let it dry.

**Overall Impression:** I am 100% pleased with this **Mad Mat Rug!** It is extremely well made, beautiful to look at and has a functional practical purpose. If you enjoy entertaining outdoors and want your outdoor living space to look beautiful, you have got to check out the rugs that they sell! All of them are affordably priced! I give this company and this product a big two thumbs up! In the future I would love to see some nautical designs!
